Open Ceiling Solutions

The trend toward replacing suspended ceilings with those that expose the deck and mechanical elements presents some problems regarding acoustics that are not immediately obvious. When the ceiling is removed the sound absorption in the space is diminished extremely.

Sound Management Group has the solution.

Cloud vs Flush Mount Panels

By utilizing the acoustic configuration of “the cloud panel”, the decoupling effects of an absorber substrate are optimized by hanging the material rather than flush mounting into ceiling.

Sound Management Group Acoustic Cloud Solutions

One system to create a more effective and aesthetic response to the drop ceiling of old
