Typical Noise Problems in Educational Facilities

- Overall Noise Levels
- Distortion
- Distraction
- Lack of Privacy

Areas Where Acoustic Treatments Can Help

- Gymnasiums
- Music Rooms
- Lecture Halls
- Auditoriums
- Counseling Rooms
- Cafeterias
- Multi-purpose Spaces
- Administrative Offices
- Medical Facilities (Nurse Office)

Lecture Hall

Whether reducing reverberation time to improve speech intelligibility in classrooms, lecture halls and multi-purpose areas, creating speech privacy within counseling areas or inhibiting intrusive sound to minimize distractions, Sound Management Group is the source for turnkey solutions within any educational facility. Our goal is to provide cost-effective solutions with superior results.

Music Room

Benefits of Proper Acoustical Treatments

- Enables instruction to be not only heard but understood; particularly important for students with hearing deficiencies.
- Enables multi-purpose space to be truly functional i.e. for gymnasiums and cafeteriums to be functional for assemblies.
- Creates confidential speech privacy in counseling and medical space.
- Reduces noise levels to a tolerable level for maintenance of staff sanity and stress reduction.
- Neutralizes distractions in administrative offices to enhance efficiency.

Multi-Purpose Room

Acoustical wall treatments control distortion and reduce noise levels

Installation Methods

Hook and Loop (Velcro)

Hook and loop fasteners are used to affix SoundDelete™ wall panels to clean, smooth, non-porous surfaces.

Banner / Baffle Hangers

SoundDelete™ baffles feature eyelet hooks to make hanging simple. Banners have reinforced brass grommets. Suspension materials can range from decorative chain to unobtrusive fishing line.
